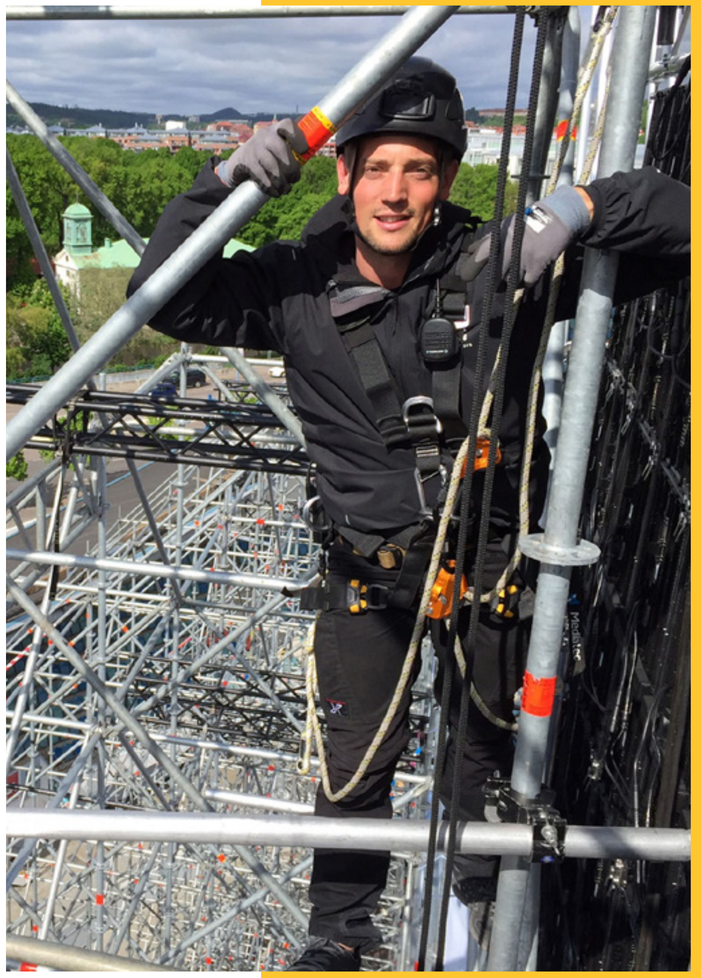
CREATIVE TECHNOLOGY

BRAND PLAYBOOK



Achieve Anything With Creative Technology

This Brand Playbook is the home of the Creative Technology story including all things related to the use and sharing of the brand both internally and externally. It brings together the marketing tools, guidelines and templates from across the company into one central place that can easily be shared and updated. The goal of this document is to centralise the documents and conversation relating to the Creative Technology brand and make them easier to appreciate, understand and follow.

Mission and Vision

Mission Statement:
At Creative Technology our mission is to deliver premium, sustainable solutions to our customers across the globe by combining the best talent with the latest technology. We live our passion and we are proud of our work.

Vision Statement:
Passionate people transforming creative ideas into technical reality.

Elevator Pitch

Elevator Pitch:
Creative Technology provides technology, technical management, production support and engineering to the global live events and systems integration markets. Our teams of highly skilled engineers and experienced project managers provide a level of service that is unmatched in our industry. We take pride in delivering the best technology for the job along with the best operational support to get the job done. With personnel and equipment positioned across the globe in 34 offices and 17 countries, we truly offer a global reach with a local touch.

Our goal is to inspire people while delivering our clients' vision using technology in creative ways. Large or small, we take pride in every project as we strive to exceed expectations and deliver amazing results. We are the cornerstone of the NEP Group's Live Events Division, the world's premier provider of outsourced technology, staging and production services to event organisers and content creators. We share a core set of values that include doing what is right, always innovating and embracing the possible. This shared culture not only allows us to put the customer first, but it challenges us to be creative in the solutions we offer.

Alongside our own global network of dedicated CT facilities, we have access to significant additional in-group resources across broadcast services, virtual studios and live events.

As a global company we are also keenly aware of the world around us and we strive to be a sustainable partner with the environments we work in.

Here at CT we truly believe you can achieve anything with Creative Technology.

Slogans and Taglines

Slogan:
Achieve Anything With Creative Technology

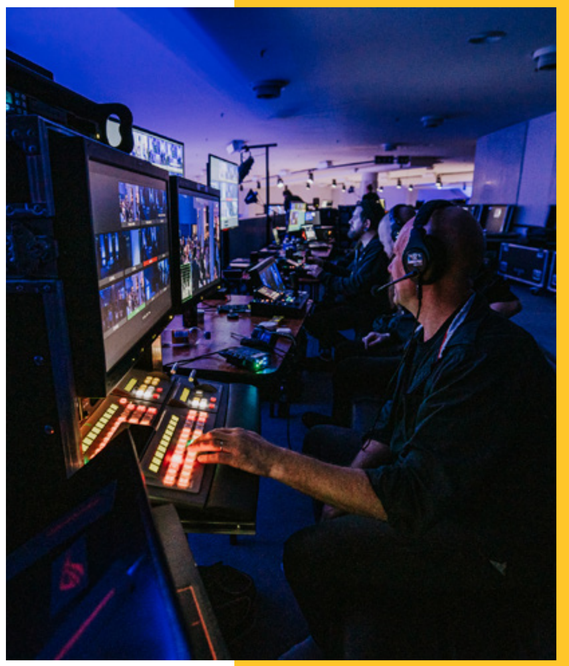
Additional Slogans:
To be used in conjunction and to support our top-level “Achieve” tagline:

Inspiring People with Creative Technology
Make It Amazing with Creative Technology
Deliver Your Vision with Creative Technology

To define size, location and range of the company:
Global Reach. Local Touch.

To be used with partners and clients to highlight service and show action and capabilities:
Turning Creative Ideas Into Technical Reality

To highlight our people, training and educational messaging and showcase how we work and what our teams are capable of:
Creative With Technology



BRAND STYLE GUIDE

CREATIVE
TECHNOLOGY

Our Logo

Logo Guidelines:

CT live events logo consists of 4 elements: The icon, the monogram, the NEP tagline and the region callout.

The size and position of the 4 elements must remain fixed and unchanged with the only exception being the removal of the regional designations for specific global CT branding.

CT SI Logo consists of 3 elements: the symbol, the monogram and the tagline. The size and position of the 3 elements must remain fixed and unchanged.

No Strap Line: The live events and SI strap line can only be removed for use on the website and merchandise and where possible the strap line should be produced elsewhere on the item.

Tagline Font - Fira Sans Semi Bold

ASIA PACIFIC
EUROPE
MIDDLE EAST
NORTH AMERICA

Bold Region
Bold region logos are used to specify a region.

ASIA PACIFIC
EUROPE
MIDDLE EAST
NORTH AMERICA

No Bold Region (Global)
When no region needs to be specified but we still want to show our global presence.

Just the Box
When you just need to show the brand without a global region designation.

Black Background
In some instances like promo materials, vehicle wraps, shirts, cases and other marketing materials, we will still need to use the logo on a black background. If you are unsure when to use this please ask your regional marketing manager.

Landscape
This should be used only in circumstances where the portrait version is not appropriate. Examples: building signage, lanyards, rack or equipment stickers, etc.

Super Landscape
This should be used only in circumstances where the portrait version is not appropriate. Examples: building signage, lanyards, rack or branded pens, etc.

Systems Integration

DOWNLOAD THE SYSTEMS INTEGRATION LOGOS HERE

Landscape
This is the primary SI logo.

Vertical
This should be used only when the landscape version is not appropriate. e.g. business cards, letterheads etc.

Super Landscape
This is only to be used on marketing items where the small landscape or portrait logo does not fit such as branded pens.

Regional Logo

Region Usage Guidelines
The CT logo has 4 regions designated by bold type.

- Asia
- Europe
- Middle East
- North America

Each region should use the bold version of their designated location on letterheaded documents.

Note: Some locations have laws in place about languages used in logos and may need a logo converted to that areas native language. An example of this is the Middle East shown in Arabic. If you are unsure please speak to your regional marketing head about this.

APAC

Europe

North America

Middle East

Middle East in Arabic

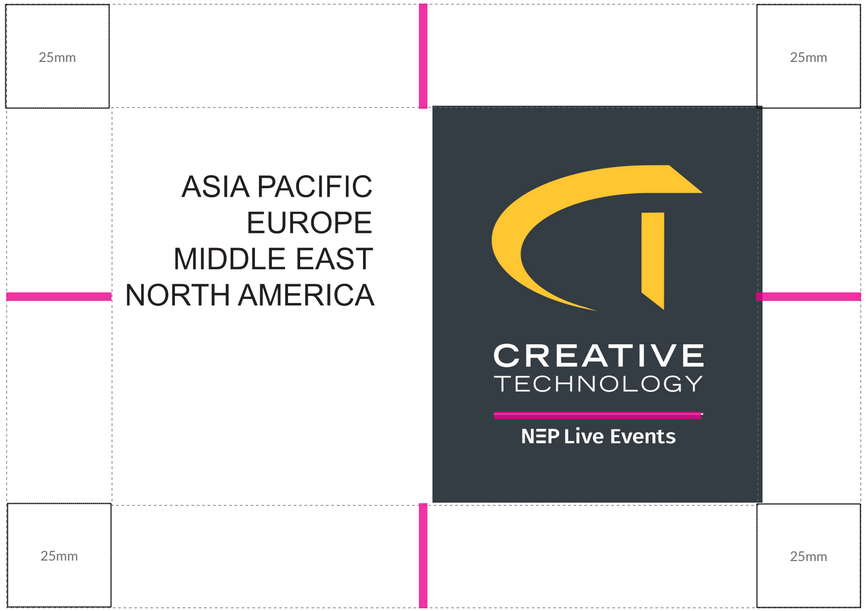
Logo - Spacing

Let The Logo Breathe

Keeping ample spacing around our logo helps keep it prominent.

The space around the logo should be no less than half the width of the monogram. In the diagram, the monogram line (highlighted in pink below), is 25mm when split in half. This measurement is to be used to provide the spacing around the edges of the logo.

For landscape logos please use a minimum spacing of 25mm



Logo Colours

Colour Usage Guidelines

In some instances the CT logo may be used in several variations for different applications. Things like; equipment cases, vehicle livery, lanyards, t-shirts, mouse pads and other “marketing” collateral will sometimes call for an alternate layout. Below are some examples of uses that are approved. If you have any questions always ask your regions Marketing Manager about the correct usage of our logo.

CT has five colour options for it’s logo.

- Colour With Black Text
- Colour With White Text
- All White
- All Black
- Black & White

If you need any other versions made please direct questions to your regions Marketing Manager.

For Use on Black Backgrounds

Black Background - All White Text & Mark

For Use on Photo or Colour Backgrounds

For Use on Photo or Colour Backgrounds - All White Text & Mark

For Use on White Backgrounds

For Use on White Backgrounds - All Black Text & Mark

Our Icon

The CT logo can be used as a watermark.
The watermark must be represented by using the “symbol” section of the logo and can have text placed on top of it.

The watermark can be used on printed and design collateral such as brochures, PowerPoint templates and truck livery. A watermark must not be applied on collateral used for business correspondence unless otherwise pre-printed, including letterhead, fax templates, business cards, email templates and compliments slips.

DOWNLOAD THE CT ICON HERE

Colour Palette

Our colour palette derives from our existing logo variations and NEP's midnight blue.

Primary Colours
Creative Technology uses two colours within its logo.

Pantone Yellow (Pantone 123c) - Spot Coated
Pantone Gray (Pantone 447c) - Spot Coated

Black & White
When working in true black and white, use Pantone Black

Typography Internal

We use one primary typeface for all internal communications and that is Arial, as it's commonly found on both PC and MAC based computers.

Font Size: 12

Primary Typeface: Arial
Arial is the primary typeface for all stationary and internal marketing collateral. Letterheads, comp slips, fax sheets, memos, invoices, purchase orders, delivery labels, stickers and similar uses should all use Arial.

Secondary Typeface: Arial Bold
Arial bold is the secondary typeface and should be used for things like headings, sub-heads and highlighting body copy for emphasis. It is also the preferred typeface for directional signage.

Emphasis Typeface: Arial Italics
On occasion, copy needs to be italicised to differentiate it from the rest of the copy. Arial Italic may be used during these times.

Aa Bb

Arial Regular

ABCDEFGHIJKLMNOPQRSTUVWXYZ
1234567890

Typography External

For typefaces used in advertising and other promotional materials, it's okay to have some fun and add personality to the brand.

Google fonts are free to use and are also available on most web platforms making it easy for us to keep our brand in line while still showing design and style. Download Google Fonts here on your PC/Mac and install into your operating systems font folder.

Primary Typeface: Lato All Weights
Lato is a sans serif typeface family started in the summer of 2010 by Łukasz Dziedzic. The semi-rounded details of the letters give Lato a feeling of warmth, while the strong structure provides stability and seriousness. "Male and female, serious but friendly. With the feeling of the Summer,"

Tone of Voice

How we speak about Creative Technology and the solutions we provide impacts how our clients, employees and the industry view us. In general, text and written elements should be casual and approachable, not stiff and formal.

Tagline: Achieve anything with Creative Technology

When you collaborate from the start almost anything is possible - from the most ground-breaking live shows to a fully integrated experience that works seamlessly day in day out.

The line also creates a feeling of optimism and confidence in the abilities of creative technology as a sector, and helps us own the space.

‘Achieve anything with Creative Technology’ also sets up a series of case study campaigns, and works as a strong call to action.

Values

Creative Technology uphold and adhere to NEP's 5 core values. These values truly represent the character of our people, and they will stand as our guide for the behaviours, interactions, and culture, which we see every day and want our organisation to be.

Each colour is assigned at one of the five core values. It is not possible to alter or change any of these colours or switch colours between the five core values.

Black and white are used as additional colours, to support the five colours and to allow the optimal contrast of the various designs.

Values Font: Poly Sans
Display - PolySans Median
Text - PolySans Neutral

PMS SPOT COATED 368

Do Right

We do the right thing.

We look out for each other and above all else we are accountable to each other, expecting the highest standards. Decency, integrity, honesty, inclusiveness and humility are non-negotiables in an organisation and an industry that requires exceptional teamwork.

RGB 102/ 204/ 0
CMYK 0/ 50/ 100/ 0
HEX #ff8500
PMS SPOT COATED 151

Embrace The Possible

We are curious minds, with a thirst for discovery.

We share knowledge generously and we love to learn. We respect each other and the expertise and experience we each bring. We invest in each other to deliver the best.

RGB 102/ 204/ 0
CMYK 100/ 68/ 0/ 0
HEX #0060cc
PMS SPOT COATED 300

Be Fearless

We are fearless innovators and problem solvers.

With our history, knowledge and expertise, we are building upon our foundations to lead for our future. We are creative in how we use the technology, not just users of creative technology. We are calm in a crisis and solve problems under pressure.

RGB 102/ 204/ 0
CMYK 0/ 18/ 100/ 0
HEX #ffcc00
PMS SPOT COATED 116

1 + 1 = 3

We are more than the sum of our parts.

We connect and collaborate across disciplines, geographies, boarders and brands. We pick up the phone, we ask the question, we get it done. We make 1 + 1 = 3 for our colleagues, our clients and everyone we work with.

RGB 102/ 204/ 0
CMYK 35/ 100/ 0/ 0
HEX #bb0099
PMS SPOT COATED 254

Deliver The Wow

We stretch the limits of imagination.

We create experiences that customers love, audiences remember and talk about, and our colleagues are proud to be part of. We get a kick out of delivering the wow.

Business Cards

CT printed business cards utilise a spot UV on the front of the card over the “CT Box” logo portion only. Some conditions apply when creating these cards, please see below.

North American and Global Regions BC Size: 55mm H x 90mm W on 16pt Matte/Dull finish with Spot UV on front only, no spot on back. 3.175mm bleed all around.

Contact info (from top to bottom): Office phone, direct dial, mobile, email, web address.

DOWNLOAD REGIONAL TEMPLATES HERE

In some regions, sustainable business cards with built-in NFC technology have been adopted. They are standard business card sizes 85mm x 54mm and range between PVC, Metal and Bamboo options. The images to the right show some examples of the NFC cards that are currently being used.

In the UK, they use black bamboo cards.
In APAC, they use black PVC cards.
In Australia, they use black metal cards.

Please speak to your regional marketing head if you would like more information on these.

Letterhead

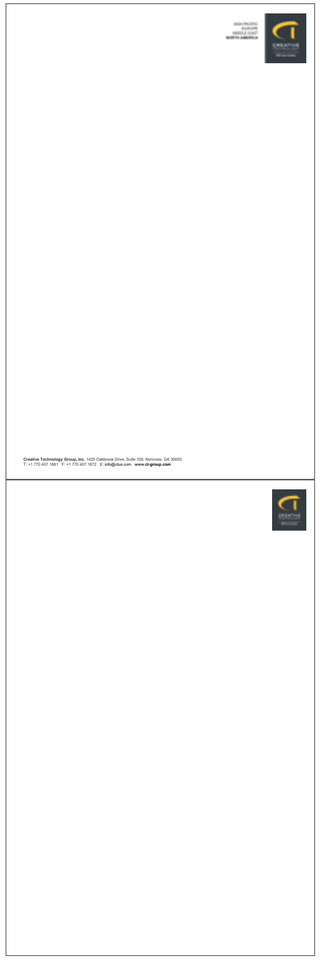
Letterhead:
Although the Creative Technology brand needs to communicate different messages to different audiences, stationery should be presented in a consistent measure across the group.

A consistent branding approach across all applications enhances perceptions within the industry and of our services.

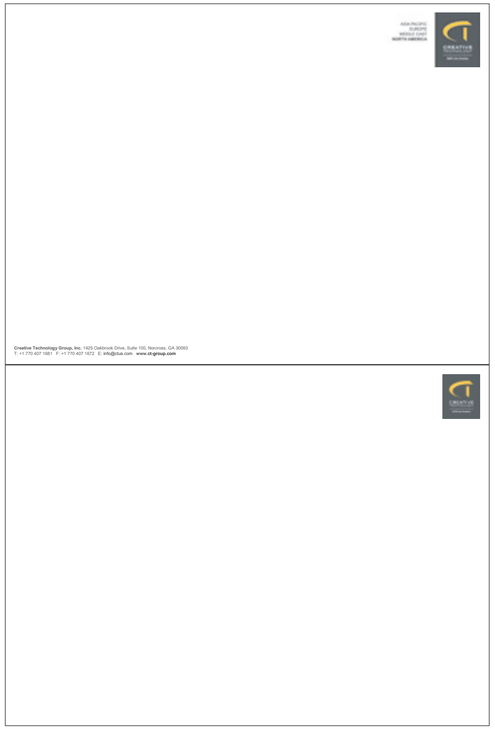
Regional variations dependent on the length of the address and the need for translated text may apply.

DOWNLOAD REGIONAL TEMPLATES HERE

Company Letterhead - Portrait

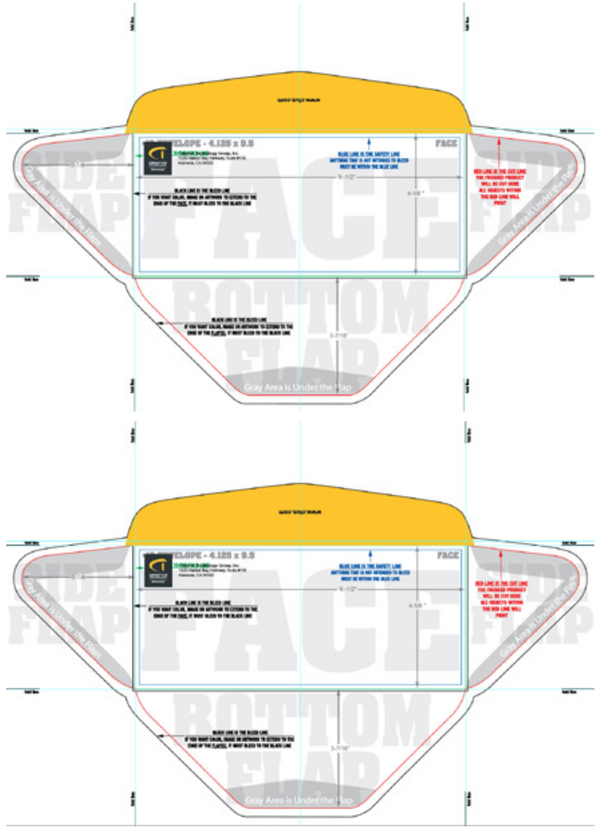


Company Letterhead - Landscape

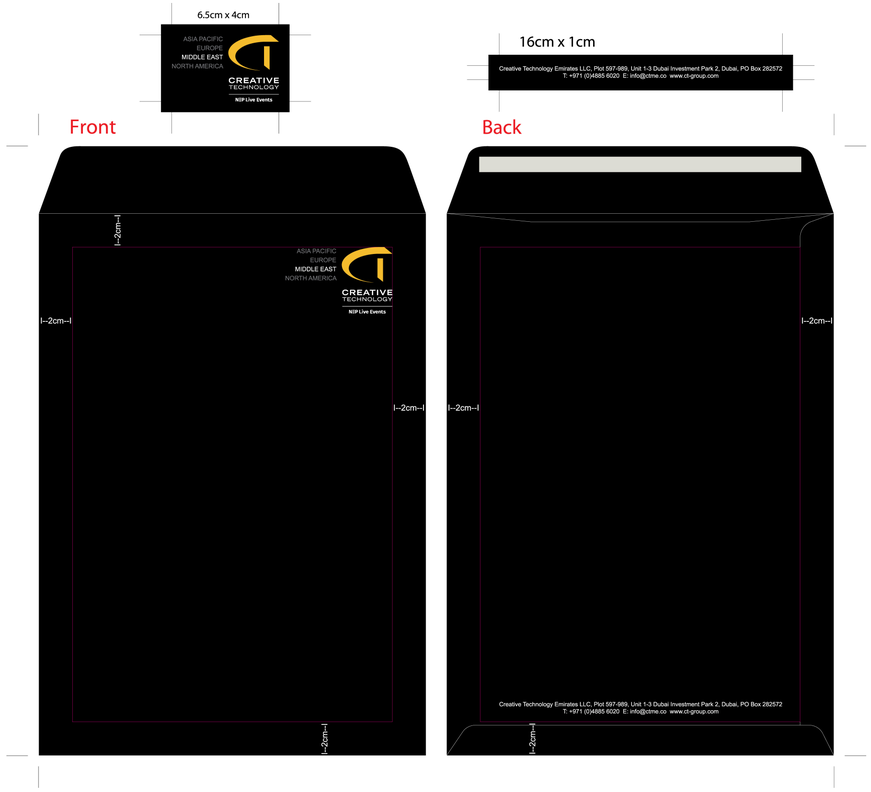


Envelopes

CT North America Envelope Example:
Envelope sizes will change by region. But in North America this is what they look like. Our logo with address on top left corner of the front. On the rear flap we have our regional URL.



CT Middle East Envelope Example:
Envelope sizes will change by region. But in the Middle East this is what they look like. Our regional logo on top right corner of the front. On the rear bottom flap we have our regional address and contact details.



Vehicle Wraps

The below images show examples of how vehicles have been branded in different regions.

Vehicle branding will change per region. Check with your Marketing Manager for correct variations.

Flight Cases

Strap Line: NEP Live Events

The portrait live events logo without a box around it should be used on flight cases.

DOWNLOAD THE PORTRAIT LIVE EVENTS LOGO HERE

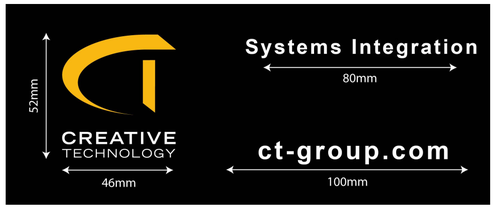
Clothing

Strap Line: NEP Live Events / Systems Integration
The strap line text can be placed on the sleeve of the shirt . The text may need to be increased for visibility. When the strap line is separate from the logo it is on the left sleeve 117mm down from the shoulder and is 75mm wide.

The vertical logo is placed on the front left of the shirt without the strap line.

CT-Group.com URL can be shown on the rear collar area.

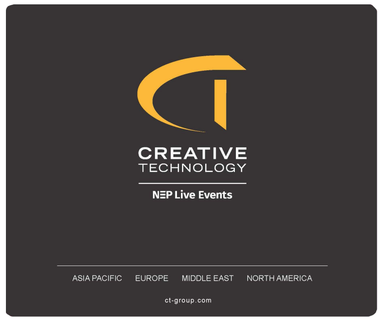
If you are unsure of where to place the logo and URL on any other uniform items, please check with your regional Marketing Manager and Managing Director.

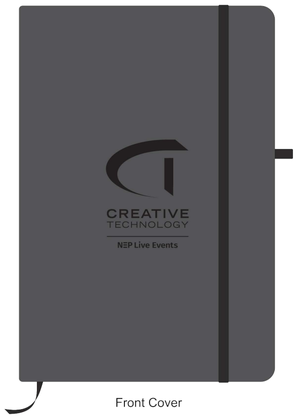


Promotional Items

Alternate Logo Examples
lanyards and pen are a few examples where a landscape logo is acceptable.

Use of All Black Backgrounds
In some marketing pieces where the material is black, it is okay to use the logo without the grey box. Here are some examples of the logo being used in various ways on different marketing pieces.





Front Cover

ConneCT

Creative Technology's outreach and education program designed to share, teach and inspire our internal teams, partners, clients and friends through regular newsletters, training sessions, symposiums and social functions.

Hashtag: #ConneCT

Uses: The ConneCT hashtag can be attributed to a number of campaigns and initiatives that focus on inclusion and diversity, education, training, knowledge sharing, thought leadership, and future generation.

Global newsletter: ConneCT is also the name given to Creative Technology's global newsletter.

ConneCT Videos:

Video Intro: "Welcome to ConneCT, Creative Technology's education initiative."

Video Outro: "That's us being Creative with Technology. For further information please contact your local Creative Technology team."

DOWNLOAD THE VIDEO TOP AND TAILS HERE

Presentation Support

One of our main goals in the marketing department is to support business development by supplying our sales teams with collateral and presentation materials to assist in the sales process.

Regions and business units vary but we do want to stay on brand by using similar templates, looks and messaging.

DOWNLOAD PPT TEMPLATE HERE

Newsletter

Creative Technology creates and distributes a quarterly newsletter called ConneCT to our external clients and partners as well as our internal staff across the globe. The newsletter is managed with MailChimp and typically goes out in March, June, September and December. Links to each newsletter are also shared on our social channels as well the News section on our website.

Each edition includes 10-12 articles from across the company that focus on:

- Thought Leadership
- Projects and Clients
- Technology and Solutions
- Our People and the Personality of Our Organisation

Press Releases

One of the main goals of our global marketing strategy is to share relevant messaging to raise awareness, enhance the brand and strengthen our reputation in the market. PR is a central communication tool we use to accomplish this. Although they are key to SEO and intended to support larger marketing campaigns, they can have a short shelf life so they should be deployed across all relevant social media channels and added to the News section of the website once distributed.

Best practices for writing PR include:

- Focus on a single, main topic, ensuring it is timely and relevant.
- Create a short and concise headline that includes the core message of the release (70 characters max).
- Properly address the who, what, where, when, how, why questions in your opening paragraph.
- Include appropriate quotes to help convey opinion and colour the topic.
- Be concise and stick to the point (fewer than 500 words).
- Include strong visuals, images, media and ensure copy and imagery of a project have been approved by the client before making it public.

All PR should be written on the global PR template and distributed via an approved PR agency, tool or to an appropriate media outlet list. Please be mindful of the CT tone of voice when writing about the company.

The two-person rule is applied to help reduce typos, spelling mistakes and any other human errors. All PR must be reviewed by your manager, the client and/or anyone quoted, and signed off by the Regional Managing Director and possibly NEP Marketing Lead if applicable.

Additional notes on Creative Technology

Creative Technology (CT) provides innovation, technology, project management and operational support to the live events and systems integration markets. As a leading supplier of specialist Audio Visual equipment and services to the Broadcast, Corporate, Entertainment, Exhibitions, Sport, and Systems Integration industries, CT brings together advice, support, and equipment of the highest quality to deliver creative technological solutions for projects of all shapes and sizes. Backed by the global support of the NEP Group, CT supports clients around the world from 32 offices in 17 countries, offering global reach with a local touch.

Page 1 | 2

DOWNLOAD THE PR TEMPLATE HERE

Case Studies

CT has created two different case study templates, one for Live Events and one for Systems Integration. We also have two different style sizes for Case Studies; the FULL Case Study (as detailed in the templates) and the LITE Case Study (more focused on visuals and including a title/ headline and short descriptor paragraph). Please use the appropriate style for your project.

Case studies differ from social posts, press releases or articles in that they offer a focused look at one specific aspect or challenge of a project. Most of our case studies will follow a cause/effect style, acknowledging a “challenge” and then describing the “solution” offered. Case studies can also take on other forms as needed based on the subject matter.

General details about the project should be incorporated throughout the piece where applicable allowing the primary message to remain the focal point. Multiple visuals are needed to support the storytelling. Where sharing information and imagery of a project, ensure permissions have been sought from the client before making it public.

The two-person rule is applied to help reduce typos, spelling mistakes and any other human errors. All case studies must be reviewed by your manager and signed off by the Regional Managing Director before posting.

Please be mindful of the Creative Technology tone of voice when writing anything about the company externally.

Creative Technology Provide Technical Delivery for The Queen’s Platinum Jubilee

LOCATION: Buckingham Palace, London

DATE: 4th June 2022

This weekend marked a momentous occasion in British history as the nation celebrated The Queen’s Platinum Jubilee after 70 years of service. Creative Technology (CT) is honoured to have provided technical delivery of the stunning Buckingham Palace projection and main stage LED screens for the BBC Studios’ Platinum Party at the Palace celebration.

This year marked the 3rd Jubilee celebration the company has been involved in with previous experience in delivering various other high-profile BBC events of this calibre including Election Night Results at BBC Broadcasting House, The 100th Anniversary of the Battle of Passchendaele, and more recently the 75th anniversary of VJ Day.

To seamlessly deliver such a large-scale and high-profile event, Creative Technology assembled some of the industry’s most skilled engineers to display the stunning content which was designed and created by NorthHouse Creative across Buckingham Palace using 32 high brightness projectors. During the show which included performances from Hans Zimmer, Celeste, and The Royal Ballet as well as words from Her Majesty The Queen, HRH Prince William, and Sir David Attenborough – an array of beautiful pictures created a mesmerising backdrop that not only told a story but brought the building to life for both the in-person audience and the 12 million viewers watching at home.

To make North House Creative’s vision into reality, CT utilised 32 Panasonic PT-RQ35K projectors with brand-new fibre input cards alongside the company’s latest advanced PC based hardware solution known as the G1. VYV’s Photon media server was used to handle playback, ensuring bright, clear projection onto the palace for the BBC’s live broadcast.

“It was a once-in-a-lifetime opportunity to be able to project onto Buckingham Palace and produce a visually stunning backdrop for the likes of Duran Duran, Alicia Keys and Diana Ross to name just a few. It was an event that should make the live events industry immensely proud to be a part of indeed!”– Will Harkin, Project Manager at Creative Technology.

Social Media Content

All social media posts should be written and sent to your manager to read through and sign-off before posting to help reduce typos, spelling mistakes and any other human errors.

When sharing information and imagery of a project, ensure permissions have been sought from the client before posting.

CT has marketers around the world who all share the same social media pages. The CT marketing schedule should be used to inform other members of what you are going to post and when you are going to post it ahead of time.

- Where possible, please avoid posting the same day on LinkedIn. If this is unavoidable then please leave a few hours between posting.

- It's ok to post on the same day for Instagram, Twitter, Vimeo and YouTube.

- Each region has its own Facebook and therefore posting on the same day does not matter here.

Images

Creative Technology want to change the narrative from only showcasing large projects in show mode to telling a story of how we create these events big or small and the people behind the technology. To do this we need to expand our stock of images to include a variety of different photos.

When taking photos please try to use a DSLR camera to gain high resolution images that can be used both on the website and in print if required. Smart phone images are great for social media but are not always high resolution.

Content Management:

Our strategy remains to capture content from our three target areas of **Projects/Clients, Technology/Solutions** and **People/Passion.**

Please share some of the best images you have from your regional projects HERE.

- Images should all be labelled with the project name, date and region. e.g. CommonwealthGames_22_08_22_UK. Images are often moved around between folders so this way everyone can easily see what project the image relates to and which region.

Whenever sharing internally please be sure to acknowledge the approval status for external use.

Staff Headshot Photography

CT want to remain consistent globally across their headshot images as these will be visible on the website and potentially presentations.
Please follow the below guidelines for taking headshot photos and refer to the images for reference:

- Images should be in colour.
- Head and shoulder shot.
- Slightly angled body to the left with the head facing the camera.
- Ideally smiling.
- Use appropriate lighting techniques.
- Shoot against a dynamic or grey backdrop.

People-Centric Photography

It is important to show the scale of projects that CT work on for our clients, but those large-scale photos need to be balanced by more human-scale photos of our people doing their jobs.

People On Site:

- Ensure all staff in the photos are wearing full PPE if required / CT Swag

- Be aware of the surrounding area in the shot. i.e are there any H&S concerns? Are there other company logos showing? Is there rubbish in the background?

- Try to get images of the staff during all stages of the project i.e prepping in the warehouse, working on designs at their desk and in meetings to being on site during the build of the event if it is safe to do as well as during the show.

- If there is a type of image you require please ask the project manager if there is a good time to arrange some staged shots.

Project Photography

Documenting different aspects of a project gives us content that tells a story. CT aim to build a variety of content across different types of projects, both large and small.

Image Guidelines:

- Try to get content throughout the projects journey. i.e. Preparation, build, rehearsals and show.

- Think about getting images of the equipment- being tested, being built and in use during rehearsal. This is also a great opportunity to get images of the staff at work.

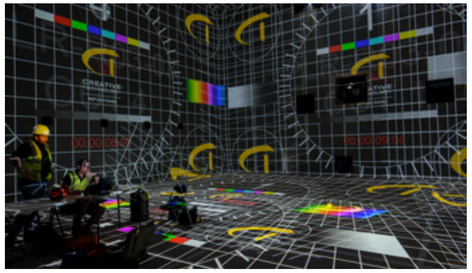
- Try to get a variety of images of the final set up such as in daylight, not in use and in show mode.

- Be mindful of the tidiness of a working space before taking a photo i.e Messy wires, dirty mugs, food, coats, bags and rubbish etc.

- Think about the position of the camera. You ideally want a selection of close up, wide shots and different angles.

- Ask the PM to explain what happens in the project so you know what to look for and when - being aware of the technology is key.

- Attend the rehearsal if the PM approves so you have an opportunity to gain more show like images. It is easier to get close up show shots and different angles during rehearsal than in show mode.



Videos

Similar to Project Photography, we want to capture video content and/or extract video content from appropriate projects whenever we can. Please see “Image Guidelines” tips from the previous page for ideas and inspiration. Our strategy remains to capture content from our three target areas of **Projects/Clients, Technology/Solutions** and **People/Passion.**

Video files are often large and difficult to share so please capture, name and store the footage on local share drives and invite the marketing team in to review when appropriate. Naming nomenclature should be the same as images so please label files with the project name, date and region.
e.g. CommonwealthGames_22_08_22_UK.

Please share the best videos you have from your regional projects HERE.

Whenever sharing internally please be sure to acknowledge the approval status for external use.

Lock Screens and Desktop

Creative Technology has created a number of “APPROVED” graphics for lock screens and desktops for company owned and personal devices. Please feel free to share these with your appropriate internal departments for use. If you would like to submit additional options for approval please reach out to claire.armes@ct-group.com.

Website

www.ct-group.com

The Creative Technology website is the hub of our digital messaging and acts as both the home and central distribution point for the brand. Our core businesses, regional operations, technology offerings, personnel and messaging are all represented here.

There are various image sizes on our website. When uploading images please use the ready made sizing templates.

DOWNLOAD WEBSITE IMAGE TEMPLATES

Optimise your images for the website!
When saving your resized images in Photoshop, go to File>Export>Save for web. Make sure the correct file format is selected within the pop up box that appears e.g. JPEG.

Images should all be labelled with the project name, date and region. e.g. CommonwealthGames_22_08_22_UK.

Optimising your images will improve your page speed and user experience. If a page is slow to load, there is a high chance the user will leave the site, which affects your bounce rate. Lowering your bounce rate is usually a good indicator that your content is engaging, valuable, or useful.

Website Typography Hierarchy

Headings

H1 Heading Lorem Ipsum

Inter – Semibold – 40pt – Leading 48pt

H2 Heading Lorem Ipsum Dolor

Inter – Bold – 32pt – Leading 38pt

SEO

SEO stands for search engine optimisation - the practice of increasing the quantity and quality of traffic to your website through organic search engine results.

In short, SEO is crucial because it makes your website more visible, and that means more traffic and more opportunities to convert prospects into clients.

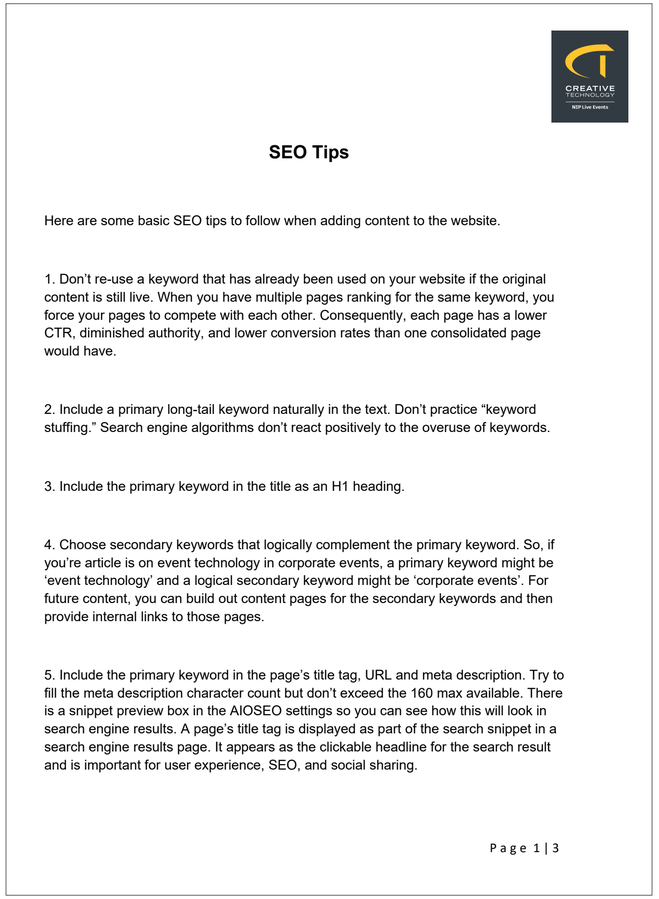
SEO Tips



SEO Tips

Here are some basic SEO tips to follow when adding content to the website.

1. Don't re-use a keyword that has already been used on your website if the original content is still live. When you have multiple pages ranking for the same keyword, you force your pages to compete with each other. Consequently, each page has a lower CTR, diminished authority, and lower conversion rates than one consolidated page would have.

2. Include a primary long-tail keyword naturally in the text. Don't practice "keyword stuffing." Search engine algorithms don't react positively to the overuse of keywords.

3. Include the primary keyword in the title as an H1 heading.

4. Choose secondary keywords that logically complement the primary keyword. So, if you're article is on event technology in corporate events, a primary keyword might be 'event technology' and a logical secondary keyword might be 'corporate events'. For future content, you can build out content pages for the secondary keywords and then provide internal links to those pages.

5. Include the primary keyword in the page's title tag, URL and meta description. Try to fill the meta description character count but don't exceed the 160 max available. There is a snippet preview box in the AIOSEO settings so you can see how this will look in search engine results. A page's title tag is displayed as part of the search snippet in a search engine results page. It appears as the clickable headline for the search result and is important for user experience, SEO, and social sharing.

Regional URL’s

Which URLs & Emails for Which Regions
CT has 4 core regions each with its own URL & email structure.

- Asia Pacific
- Europe
- Middle East
- North America

Each region should be using its appropriate URL/email structure for any marketing or advertising purposes within its region. (Shown right.)

For Global advertising & marketing, use the CT-Group.com callout like shown below.

Global Web URL: CT-Group.com
Global Email: @CT-Group.com

SI Web URL: CT-Group.com/si

Europe

London:
Web URL: ctlondon.com
Email: hello@ctlondon.com

Ireland:
Web URL: ct-ireland.ie
Email: hello@ct-ireland.ie

Sweden:
Web URL: ct-sweden.com
Email: hello@ctsweden.com

Norway:
Web URL: ct-norway.com
Email: hello.no@ct-group.com

Denmark:
Web URL: ct-denmark.com
Email: hello@ctdenmark.com

Finland:
Web URL: ct-finland.com
Email: hello.fi@ct-group.com

Spain:
Web URL: ctspain.com
Email: hello@ctspain.com

Germany:
Web URL: ctgermany.com
Email: hello@ctgermany.com

Asia Pacific - APAC
Web URL: ctasiapacific.com
Email: hello@ctasiapacific.com

Asia Pacific - Aus / NZ
Email: hello.au@ct-group.com

North America
Web URL: ctus.com
Email: hello@ctus.com

Middle East
Web URL: ctme.co
Email: hello@ctme.co

NEP Marketing Assets

As a key member of the NEP Live Events group, Creative Technology shares a symbiotic relationship with NEP and the brands reflect on each other. It is important to stay up to date with the NEP brand tools and support available to all of us.
